MULTIMAT

ANTI-SLIP SUPERABSORBENT MAT

Keep safety under your Feet!

The majority of accidents on working places happens for slips. The most common causes are wet floors and presence of slippery materials. An accident on four happens for slip.

Let's stop improvisation and not hygienic solutions to try to maintain the floor clean. **MULTIMAT** in just one product offers a great absorption of liquids such as water, oils, solvent, alcohol and no-aggressive chemical products; MULTIMAT grants a saving in costs and time of cleaning operations.

Thanks to its versatility of use, **MULTIMAT** represents the best solution for working environments as department stores, bars, kitchens, airports, schools, workshops and any places where wet floors are a concern.

MULTIMAT
THE SOLUTION

COMPOSITION:

The top is made of nonwoven. Thanks to its conic micro-holes it allows quick absorption maintaining dry surface at the same time.

The central layer, composed by cellulose, guarantees a high absorption.

The bottom layer consist of an impermeable plastic film with anti-slip treatment; it reduces the risk of slip and increases the safety in the working place.
